

TCO Digital Contractor Timesheet

Tutorial on Request for Work Authorization (RWA) module

Role in the system: Initiator

May 2025

Tutorial objectives and overview

This tutorial is developed for TCO users to use the Request for Work Authorization (RWA) module of the Digital Contractor Timesheet (DCT) system.

The purpose of this tutorial is to provide self-study for TCO employees responsible for creating authorizations in the DCT system.

Content includes the following questions:

- ❖ What are DCT and RWA?
- ❖ Creating new authorization
- ❖ Requesting a price proposal
 - ❖ Requesting a price proposal from multiple BPs within one authorization
- ❖ Working with price proposals
 - ❖ Returning a price proposal to a business partner for revision
 - ❖ Sending a Price Proposal for approval
 - ❖ Offloading of price proposal (worksheet)
- ❖ Creating Change order

Glossary

- **DCT** – Digital Contractor Timesheet, digital accounting system of contract employees' timesheets
- **SR** – Service Request
- **BP** - Business Partner
- **RWA** – Request for Work Authorization – document that describes the requested work
- **SMART by GEP** – A cloud-based solution for buyers and suppliers that tracks contracts, service requests and is used for invoicing
- **AMEV** – Accommodation, Meal, Equipment, Vehicle
- **Price book** – E-catalog that contains all positions and business partner rates
- **Supplier** – Business Partner representative responsible for Price Proposal submission.
- **Reviewer** – TCO representative responsible for review of authorization prior to price proposal
- **Approver** – TCO representative responsible for review of authorization after receiving price proposal
- **PP/ Price proposal** – Price Proposal of the TCO Business Partner.

What are DCT and RWA?

Digital Contractor Timesheet (DCT) is a digital timesheet of the contracted employees. The system is designed to optimize the the process of submission, review and approval of timesheets submitted by TCO Business Partners under “Rates Based” contracts.

Request for Work Authorization (RWA) is a request to perform work. The module is designed to

- Optimize the process of request and review of the TCO Business Partners’ Price Proposals
- Simplify process of timesheet approval based on the review according to scheduled positions out of authorizations.

Requirements for using the system:

- ❖ User must have an account (user ID / network ID)
- ❖ Internet connection
- ❖ Internet browser: Microsoft Edge, Chrome

DCT System Overview

Request for Work Authorization

Request for Work Authorization (RWA) is a request to perform work.

The authorization statuses in the DCT system are as follows:

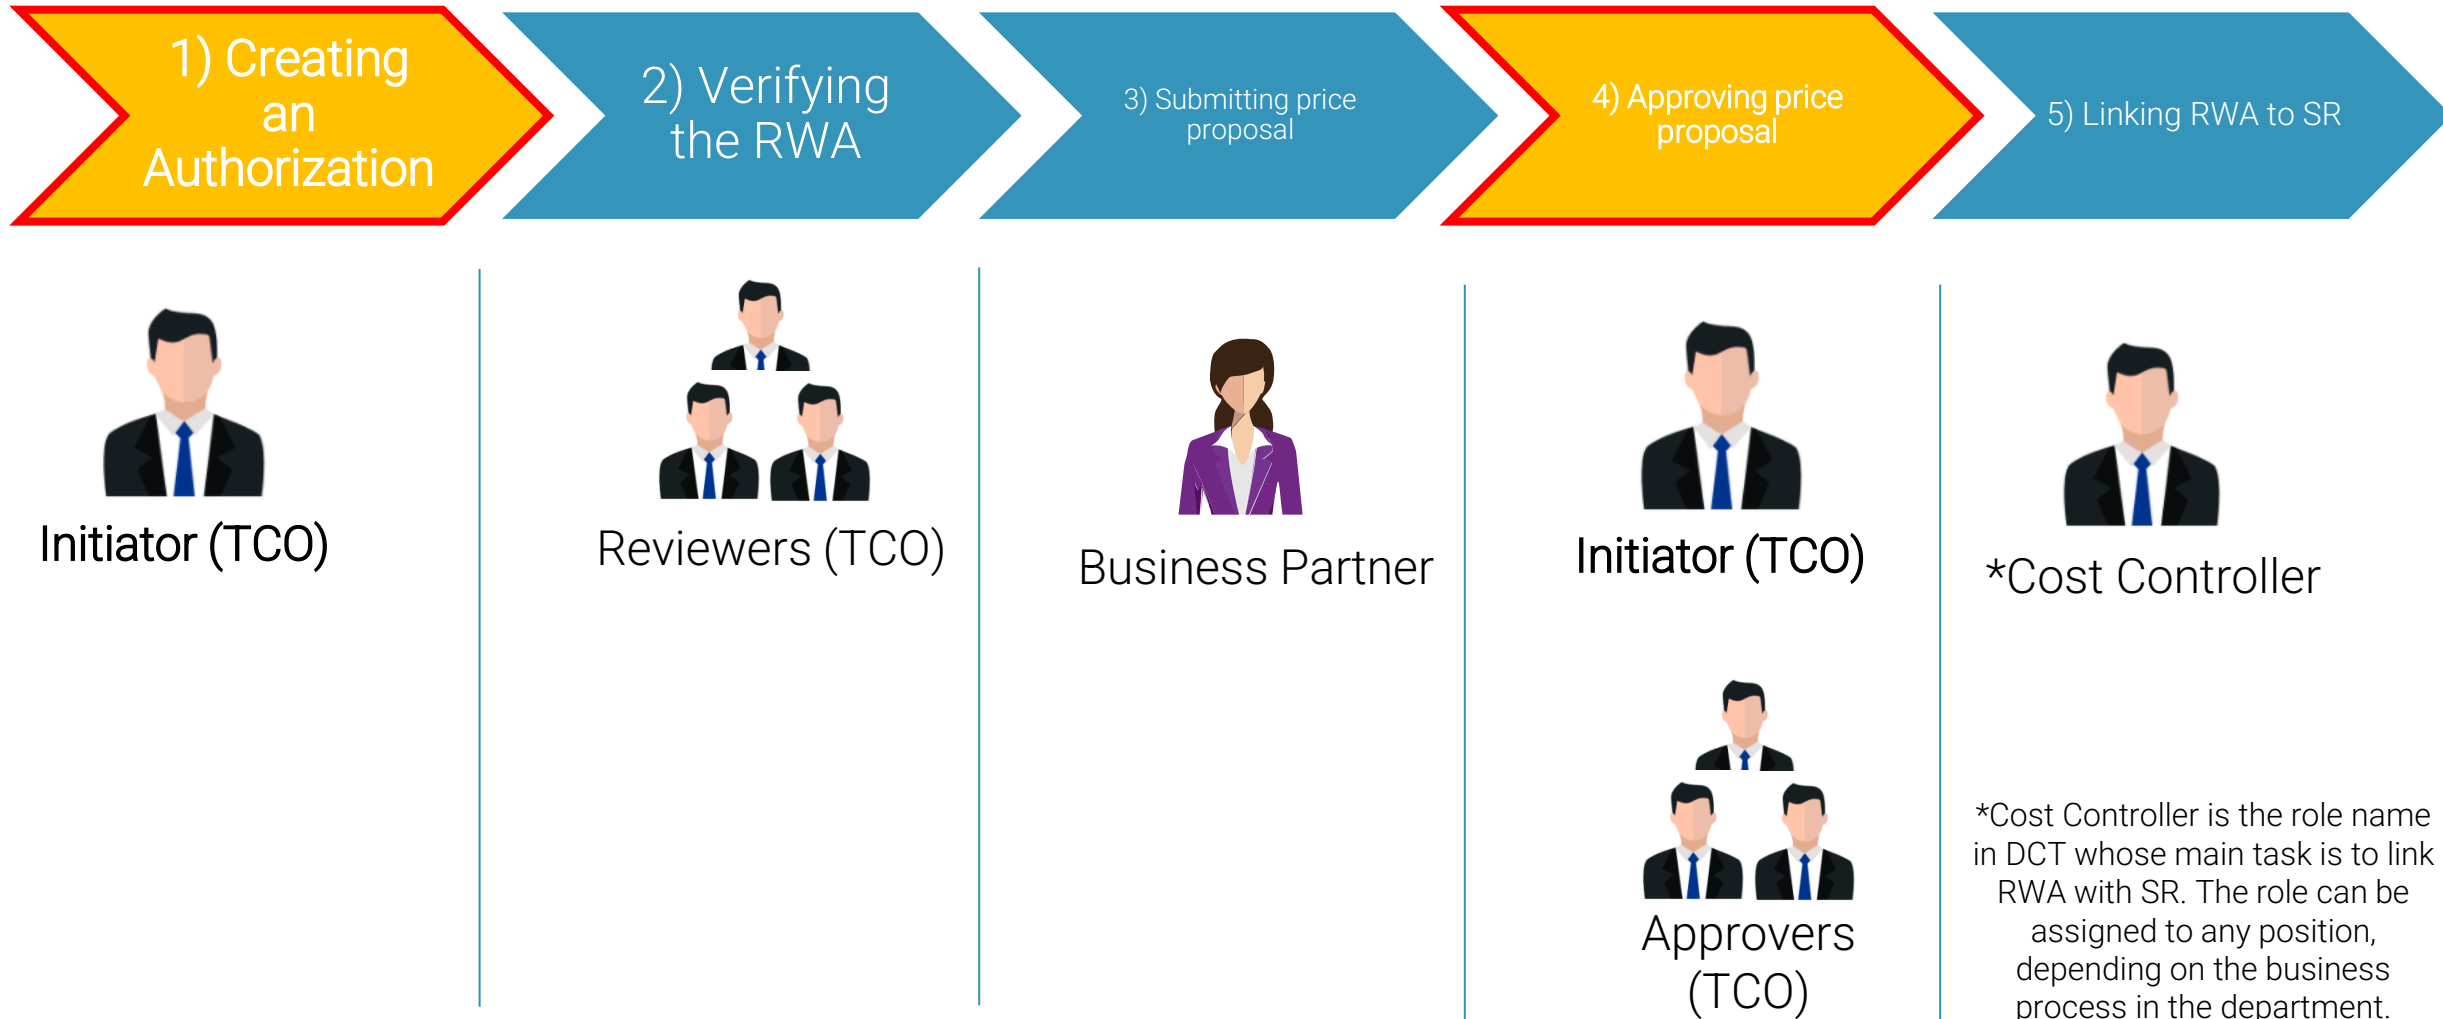

No.	Title	Description
1	Open for modification (Draft)	Draft authorization with filled out title page (RWA details)
2	Waiting for review	Authorization waiting for review at Reviewer's
3	Declined by reviewer	Authorization declined by Reviewer that waiting for correction of the title page by Initiator
4	Waiting for price proposal	Authorization waiting for Business Partners' price proposal
5	Waiting for approval	Authorization waiting for for approval of the Initiator's, Approver's price proposal
6	Approved	Approved authorization, waiting for connection with SR
7	Linked to Service request	Approved authorization linked to SR
8	Waiting for correction	Authorization, waiting for correction after receipt of price proposal
9	Canceled	Canceled authorization

DCT review (continued)

RWA process

Working with authorization in the DCT system consists of 5 basic steps, which are described later in this tutorial:

Note the Initiator role: steps 1 and 4.

Access to DCT TCO users

You need to request access to system in the [ServiceNow](#) portal
Complete the form

TCO - Digital Contractor Timesheet Access request

Requests to Timesheets, Request for work authorizations

Access request

* Please indicate your access level

RWA initiator

* Why do you require access?

☒ Permanent access for regular use ☐ Temporary access for special cases

Specify Period

* Need to do

☐ Revoke access ☒ Grant access

Comment

* Approver Full Name ⓘ

line supervisor or information steward for special cases (audit)

Add attachments

Please choose:

- access level → RWA initiator,
- Permanent, Temporary
- Grant, Revoke

Please fill the name of your line supervisor in 'Approver Full Name' field

Access to DCT External users

1. Support team will make request to create 3PC Account for external users to the TCO network in the [ServiceNow](#) portal
2. The Support team will request access to the TCO DCT system in the [ServiceNow](#) portal after receiving approval to create a 3PC account for external users

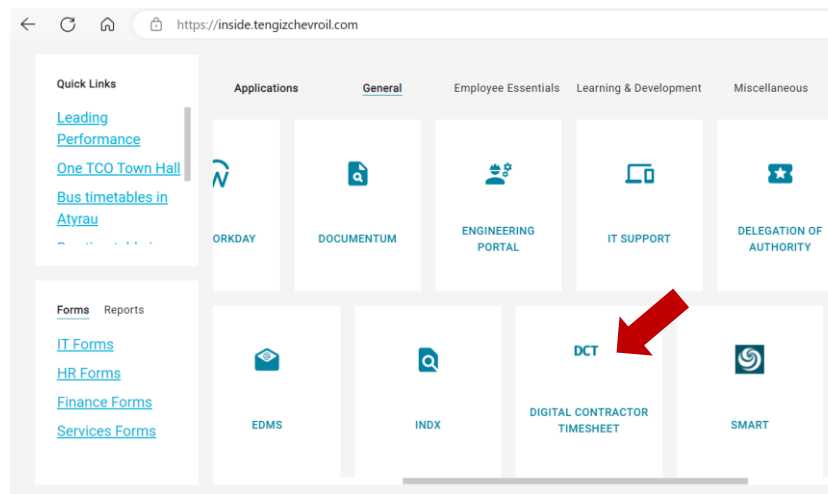

Opening of TCO DCT system

Getting started in the system

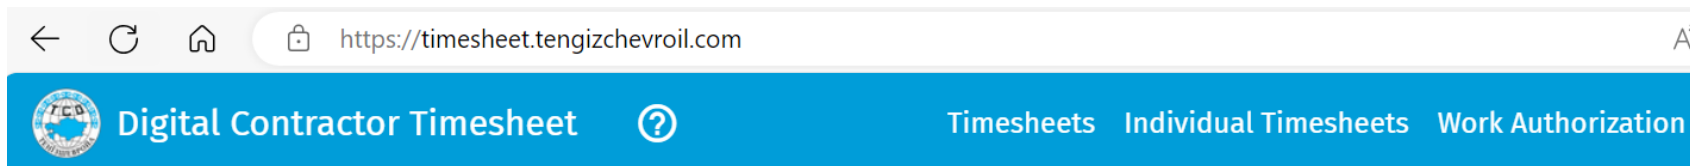

Once you have access to the DCT system, please open the system by clicking on the link:

<https://timesheet.tengizchevroil.com> , or type timesheet.tengizchevroil.com in browser

bar A link to the DCT is also available on [TCO Inside](#)

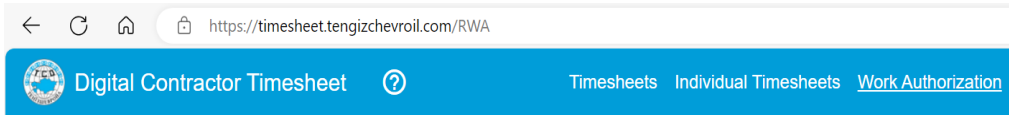

The main menu has the following view (under the browser bar) where the RWA module is contained in the “Work authorization” tab

Step 1. Creating Authorization

A page with a list of authorizations

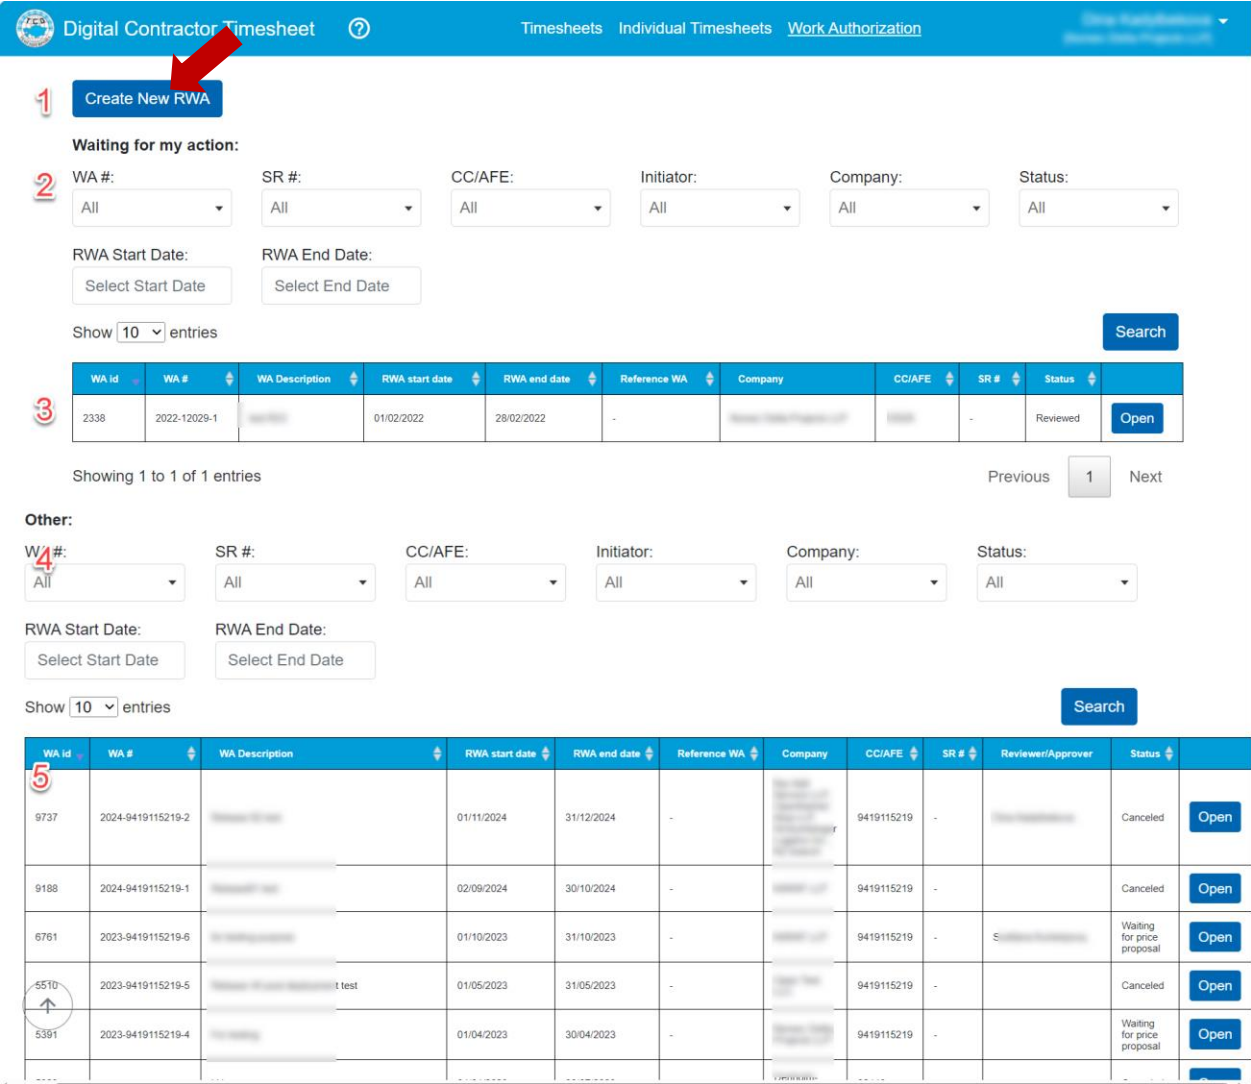

The Work authorization page consists of:

- 1) Options to create new authorization
- 2) A search engine that searches among authorizations waiting for action from the current initiator.
- 3) A table with a list of authorizations waiting for action from the current initiator (your "To do list")
- 4) A search engine (by default, "All" is selected)
- 5) A table of search results (default shows all authorizations relevant to the current initiator).

Action: To create a new authorization, click on the **Create New RWA** button

The expanded authorization page will open in a new tab

Step 1. Creating Authorization (continued)

Filling Title page

In the expanded authorization page fill in the required fields (mandatory fields are marked with '*') and click on Save.

After clicking on Save the authorization status 'Open for modification (Draft)' will be assigned

https://timesheet.tengizchevroil.com/RWA/Details

Work with authorization

Creating Change order (continued)

2. Expanded authorization page. Via the Authorization page. This method allows you to change the Reference RWA end date in order to create a Change order with the changed rates for the active SR.

Action: click on “Create CO” on the authorization page for which you want to create the Change order. This option is only available to Cost controller role representatives, as **the creation of the CO will entail a recalculation of the PP of the authorization itself** (see next slides).

Create CO

Create Change order for changing rates

RWA start date

15/12/2024

RWA end date

CO start date

CO end date

31/12/2024

This way of creating a Change Order should be used carefully and is applicable only for special cases like changing the rates within the active RWA. It will cut the reference RWA's end date and its **Price proposal will be recalculated** according to the new short period.

Cancel

Create

Work with authorization

Creating Change order (continued)

A new Change order window will open, where all data from the Reference RWA title page will be pulled up.

Action: Make the necessary changes to the title page, add the RWA reviewers to the Workflow table and start the approval flow (**Submit for review**) or request a price proposal from the Business Partner (**Submit to supplier**).

The Business Partner will receive a price proposal request with the old rates, but will have the option to complete a price proposal with the new rates.

Requesting a price proposal from multiple BPs within one authorization

Filling in Title page

Add multiple companies in the “Company- Master contract”, fill in the remaining fields of the title page, and specify “Price proposal due date” This field controls how the details of the PP are viewed.

Business partners will only be able to **submit price proposal before** the due date, and the initiator will only have access to view the **PP after the** due date, or access will be granted if **all PPs are received before** the due date.

After clicking on Save the authorization status ‘Open for modification (Draft)’ will be assigned

Request a Price Proposal from multiple BPs within one authorization

Filling Workflow

Add the participants in the authorization review workflow. Add the personnel reviewing the authorization opening to the Reviewers column, they will be the approvers until receiving BP PP.

Those who need to be notified about the authorization opening add to the RWA Watchers column, they will have access to view the RWA page.

And the staff who have to approve the Business Partners PP add to the Approvers column. You can add multiple Reviewers, Approvers and adjust their order via the “Insert before” checkbox, as the approval order between them will be sequential.

Make sure to specify the Cost Controller role representative, otherwise the approval process cannot be completed.

Workflow:

Workflow table should contain cost controller. Please add cost controller after all approvers.

Consideration of multiple price proposals within one authorization

Price proposal due date

The initiator of the authorization will have access to view the PP details based on the Price Proposal due date.

If all BPs submit PPs before the Price proposal due date, the PP details will be available for review by the initiator as soon as the last PP is received.

If some BPs send PPs before Price proposal due date and some during completion of the PP, access to view PP will be denied.

Consideration of multiple price proposals within one authorization

Requesting PP

If the authorization includes Reviewers, the last Reviewer will request a PP from all BPs. If there are no Reviewers, the initiator will request a PP. This process is regulated by the DCT system. Users will have approval and reject buttons available depending on the Workflow structure of the current authorization

The PP request is processed by clicking the ‘Submit to supplier’ button, after confirming the action in the dialog box, email notifications will be sent to each BP separately, and the authorization status will be updated to ‘Waiting for price proposal’.

Consideration of multiple price proposals within one authorization

PP Review Returning for correction

It is also possible to return the Price proposal to specific Business Partners or to all of them for correction.

However, before the price proposal is sent for revision of the BP, it is necessary to make sure that the **"Price proposal due date"** has not expired. That is, if the "Price proposal due date" has passed, then you first need to extend it, then send the price proposal for revision of the BP, otherwise the worksheet will not be displayed for BP adjustment.

Returning price proposal for correction

Company		Reason for returning
Denholm-Zholdas LLP	☐	
Nefteistroiservice Ltd LLP	☒	
Ariadna LLP	☐

PP Review Final Approval and Link to SR

The approval of a PP by the Cost Controller role is the final approval of the PP (processing 'Approve for creating SR' action).

Each BP that submitted a PP in the current authorization will receive a relevant email notification from the system.

Your price proposal for New "Work Authorization" wasn't selected.

Details:

Company: [REDACTED]

WA Number: 2024-9419115219-3

WA Description: 1111

WA Initiator: Dina Kadylbekova

WA Start Date: 01-Dec-2024

WA End Date: 31-Dec-2024

Thank you!

Kind regards

TCO DCT

Consideration of multiple price proposals within one authorization

What is important to note

1. Before the PP (price proposal) is sent for revision to the BP, it is necessary **to ensure that the "Price proposal due date" has not expired**. That is, if the "Price proposal due date" has passed, it must first be extended, then the PP can be sent for revision to the BP, otherwise the PP will not be displayed for BP correction.
2. If any BP refuses to provide a price proposal, a PP with a zero amount must be sent in the DCT. To do this, the BP can add any item with zero quantity of resources and add a comment stating the reason for refusing to participate in the light bid.
3. Otherwise, when sending the PP for revision to another BP (with an extended "Price proposal due date"), the system will expect a PP from the BP that refused and will display the details of the revised PP from other BPs only after the "Price proposal due date".
4. Initiators are recommended to use the "Rollback" function only when it is necessary to withdraw the PP request from all BPs in order to make corrections to the authorization title and request PPs from all BPs again.
